BUSINESS PROFILE, NOVEMBER 2026

TELEION
TECHNOLOGIES

Everything we build thinks.

Technology that thinks, for every business, not only the biggest.

WHO WE ARE

The best technology in the world should not belong only to the biggest companies.

Teleion Technologies is a technology company. We build technology that thinks, and we build it for every business, not only the biggest: websites that answer and book, software that does the routine work, AI built into the systems a company already has, training that helps teams think with AI, and Teleion Plexus, the business system behind it all. Instead of a suitcase of subscriptions, clients get the programs they need, with Teleion Plexus running in under 60 days.

Teleion is Greek for mature, complete, fully grown. Paul uses the word in his letter to the Ephesians (4:13) for growing up into fullness. That is what we want for every business we work with: fully grown, and running on technology that thinks. Teleion works by Christian values. You will see them in how we work: honest about AI, fair prices, promises kept, and people treated well.

FOUNDED

2026

BASED IN

Pretoria, South Africa

OUR VISION

Intelligence as ordinary as electricity.

WHAT WE BUILD

Six things, one brain behind them.

Websites

Websites that answer questions, book meetings and learn which pages work. For any size of business.

Custom software

Software that learns how your business runs, does the routine work and warns you before problems cost money.

AI integration

We give the systems you already have a brain, so they share what they know and act on it.

AI training

Teams that think with AI, and know where it helps and where it does not.

Industry solutions

Systems that know your trade, like courier software that plans its own routes.

Teleion Plexus

The brain behind everything we build: one system for your whole business, running in under 60 days.

THREE WAYS TO START

Start with a website. Switch on more when you are ready.

Every Teleion website runs on Teleion Plexus. When you are ready, switch on your AI team.

PACKAGE 1

Website

R9,900 once-off

US$1,200 outside South Africa

Up to 5 custom designed pages, words written by Teleion, enquiries in one inbox, and hosting and domain for the first year.

Live within 5 working days

PACKAGE 2

Website with a back end

R24,900 setup, then from R1,490 a month

US$2,500 and US$149 outside South Africa

Everything in Package 1, with leads and bookings, a website assistant that knows your business, and your first AI roles.

Live within 30 days

PACKAGE 3

Teleion Plexus

From R8,000 a month, setup from R50,000

From US$800 a month and US$5,000 setup outside South Africa

Your whole back office, the full AI team and one brain for everything your business knows, priced by the size of your company.

Running in under 60 days

Turnarounds count from payment and content. South African prices exclude VAT.

TELEION PLEXUS

Teleion Plexus runs your back office, with an AI team already built in.

Your website, your money, your people and your tools, connected in one place, with a ready made AI team and a brain that knows your business.

The AI team, built in

- Chief financial officer
- Chief marketing officer
- Head of HR
- Head of sales
- Accountant
- Office administrator
- Librarian, who keeps what the business knows
- Chief operating officer — Coming next

What it does

Runs the back office
The routine work of running a company gets done, every day, without being chased.

Shows all the data
One live view of the whole business, and of the cash, instead of a report someone has to build.

Provides and runs the team
The AI team comes built in, and people and AI staff work from one place.

Holds the intelligence
Everything the business knows is in one brain that every part and every AI role draws on.

Connects everything
One system instead of a suitcase of subscriptions.

HOW WE WORK

You see what we can

do before you pay.

01

We look

At your business and the website you have today, and where technology that thinks can help.

02

We show you

A sample of your new website, built before you pay, so you can judge the work itself.

03

We deliver

A Website live within 5 working days, a Website with a back end within 30 days, Teleion Plexus running in under 60 days.

04

You grow

Switch on the back end, the AI team and the rest of Teleion Plexus when you need them. Nothing starts over.

WHAT WE STAND FOR

Nothing dumb leaves our hands.

Honest about AI

We say where AI pays and where it does not, and we promise only what our technology can actually do.

Fair prices

Plain prices you can understand before you sign, and no suitcase of subscriptions.

Promises kept

When we say under 60 days, we mean it. If anything slips, you hear it from us first.

People treated well

Clients, staff and partners are treated the way we would want to be treated.

First principles

We rethink familiar things instead of copying them, starting with our own website.

TALK TO US

Now your business can think.

Tell us how your business runs, and we will tell you honestly where technology that thinks can help, and where it cannot.
